SCOPE OF JOURNAL

Journal of Veterinary and Animal Sciences (JVAS) with pISSN 2550-1283 is a peer-reviewed journal which is devoted to the advancement and dissemination of scientific knowledge concerning veterinary and animal science which includes research findings, case reports, experimental design, and their application for the treatment of diseases in birds, wild and domestic animals. This journal is published in English twice a year on February and August by the Institute for Research and Community Service, Udayana University. It covers all the scientific and technological aspects of veterinary medicine in general, anatomy, physiology, biochemistry, pharmacology, microbiology, pathology, public health, parasitology, infectious diseases, clinical sciences, biotechnology, alternative veterinary medicine and other biomedical fields. In the field of animal science, the journal receives original manuscripts covering breeding and genetics, reproduction and physiology, nutrition, feed sciences, animal products, biotechnology, behavior, livestock farming systems, sosio-economic, and policy

ABOUT JOURNAL

Journal of Veterinary and Animal Sciences (JVAS) is a scientific journal published since 2017. The journal is consistently two times a year in February and August. The journal is registered in DOAJ. JVAS already used turnitin to prevent any suspected plagiarism in the manuscripts.
